

# PART # 569 - 570 - 839 Rear Window Seal

## *Instruction Sheet Master*

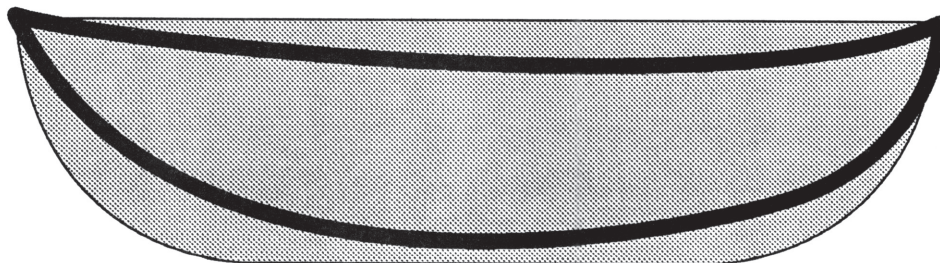

Revised 12/2017

Follow the steps below to Install the seal around glass.

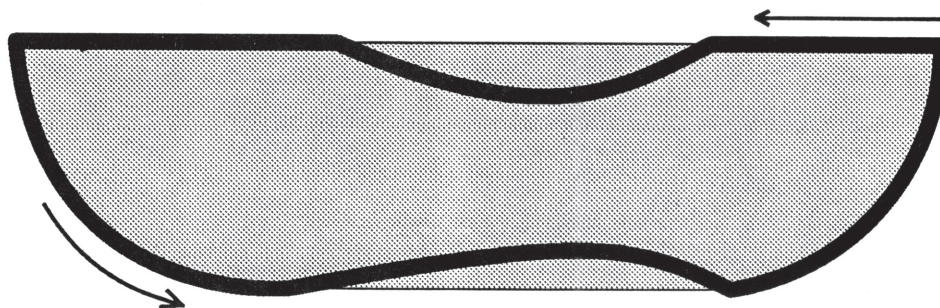

### Step 1

Slip the window seal onto the corner of the window.

### Step 2

Work the remaining seal toward the center on both top and bottom of the window.

NOTE: Our window seal is just like the Original Chevrolet seal.  
IF IT'S NOT HANDLED WITH CARE THE SEAL MAY TEAR.

### Step 3

Refer to your **Shop Manual** for removal and installation instructions in Section 1. Check the condition of your window moulding clips. **Order Danchuk Part #247 - Window Moulding Clips.** One set is required. Unlike the Front Windshield Seal where the moulding along the top and side insert into the rubber seal, these clips go on the body **before seal is installed.**
